UWC MANAGED PRINT SERVICES

IMPORTANT THINGS TO KNOW WHEN RETURNING TO CAMPUS

Pay for printer credits with Intelipay and SnapScan in-app payments

The two offsite loading facilities we will be using at all campuses for credit/debit cards transactions are **InteliPay** and **SnapScan**, this is not linked to the Students UWC fee account, it is solely a debit/credit card transaction loading platform.

Should a student be on campus and wish to make use of our self-help kiosks, the following is available:

- **MAIN LIB**, a kiosk is located in the foyer, the student would be able to load cash, make use of a debit/credit card facilities or load Snapscan

- **MAIN LIB**, on Level 9 we have a mini kiosk where the student would be able to make use of a debit/credit card loading facility and Snapscan

- **RES LIFE**, the student would be able to load cash, make use of a debit/credit card loading facility or load Snapscan

- **TYGERBERG**, we have a mini kiosk where the student would be able to make use of a debit/credit card facility and Snapscan.

- **CHS**, the student would be able to load via Intelipay and Snapscan

INTELIPAY

http://uwc.intelipay.co.za

- InteliPAY is a web based deposit portal whereby the student can load funds from anywhere and from any internet based device i.e. Laptop, Tablet, Smartphone etc.

- InteliPAY, supports both credit card / debit card deposits, as well as, Snapscan.

- Within minutes, approved funds are reflected on the Students PaperCut account. Students are now ready to make use of the printing facilities.

Why deploy InteliPAY

- Web based architecture, students click on a specific web address and navigate the portal from the luxury of their homes/ campus environment.

- No need to be on campus to initiate deposits as this is effectively an offsite loading facility.

- Offering 24/7 access to loading funds

- No queuing of students

- (See attached for the URL address)

SNAPSCAN

It starts with a download and ends with a snap

- The student would download the app and will need to scan the provided barcode

- Snapscan ensures that the students information is safe & abides by PCI (Payment Card Industry) regulations, an international standard.

- With regards to payments, when the student makes a debit or credit card payment via the app, they are required to input their password which they would have created.

- SnapScan does not store any card information on our system which adds an extra layer of student information protection.

- SnapScan app requires a PIN to be entered before any transaction can be completed. This prevents anyone who may have the phone from making transactions without visibility of a valid PIN. Card details are also safely and securely encrypted. Even if the phone is stolen, nobody will be able to see or access card details.

- (See attached document on how to download the SnapScan app)
